Experience

Company A – City, Region **Month Year – Present**
[Current role] **Month Year – Present**

- Chose [architecture] for [service] over [alternative] because [constraint]; split the migration into [stages] with [rollback condition].
- Defined [shared API contract] with [consumer teams]; migrated [N] integrations and kept [old behavior] working until clients moved.

[Earlier role at the same company] **Month Year – Month Year**

- Traced [recurring outage] to [failure mode]; changed [isolation or recovery mechanism] and verified recovery with [failure test].

Company B – City, Region **Month Year – Month Year**
[Previous role]

- Migrated [schema or datastore] with [dual-write or backfill method]; reconciled [records] before cutover and tested rollback.
- Removed [bottleneck] in [request path], reducing production p99 latency from [A] to [B] ms at [comparable load].
- Staged [release] behind [flag or canary]; paused rollout when [signal] crossed [threshold] and fixed [cause] before resuming.

Company C – City, Region **Month Year – Month Year**
[Earlier role]

- Moved [slow operation] to [background worker]; made writes safe to replay and added handling for jobs that exhausted retries.
- Automated [manual workflow] with [validation check]; gave [operator] a way to inspect and rerun failed steps.
- Fixed [defect] caused by [state or timing condition] and kept the failing case as a regression test.
